

Pulsar Franchise Opportunity

Franchise opportunities are now available with **Pulsar** to the right candidates.

What is Pulsar...?

Pulsar has developed a leading product which uses intense pulsed light technology to safely and effectively deal with unwanted hair.

The Franchise is remarkably simple and although particular regions have already been secured, Pulsar has a number of highly lucrative regions still available for right candidates.

How the Franchise works...

Each franchisee drops off the ipl machine at a salon in the morning, the machine is left with the salon to work all day, once the treatment is finished, it is then collected to be taken to the next salon the following day. The machine is highly portable and easily managed by one person.
